

IPLit Update

January 2007

IPRC Information & Resource Unit
School of Population Health
University of Auckland
Information & Resource Unit

IPLit Update is a monthly bulletin to keep you up to date with the latest injury prevention research and best practice from New Zealand and around the world.

News Flash

The IPLit database of all reports, articles and other resources indexed by the IPRC Information & Resource Unit since the early 1990s can now be accessed via the internet at: <http://iplit.fmhs.auckland.ac.nz>

Feedback on the usefulness and useability of IPLit would be much appreciated

You are welcome to visit the Information & Resource Unit and browse the collection. I am available four days per week. Best time to visit: Monday – Thursday, 9am – 4pm. Please call to check availability.

The Information & Resource Unit provides an enquiry service
– please contact me by email or telephone.

If you know of someone who would like to receive this monthly update, please contact me

Gay Richards: email: injury@auckland.ac.nz or by phone: (09) 373 7599 x84640
IPRC website: <http://www.health.auckland.ac.nz/ipc>

Full contact details can be found at the end of IPLit Update

Events

4 March Children's Day to be celebrated in New Zealand
www.childrensday.org.nz

Advance Notice 23-29 April 2007 UN Global Road Safety Week Theme: Young Road Users www.who.int/roadsafety/projects/week/en/index.html

Publications

IPLit Update Includes books, reports, articles, journals and newsletters received or accessed this month. Active links to documents freely available on the web are provided, however web addresses can change. If the link does not work, try going to the homepage, shown at the beginning of the address and look for a publications or resources page, or contact me. DOIs are provided where available. These are permanent links to journal articles but unless the publisher provides free access to articles, you may only be able to reach the abstract via this link.

IPNANZ members are reminded that they have free access to the *Injury Prevention* journal via the IPNANZ website – <http://www.ipn.org.nz> . If you have forgotten your IPNANZ login details, please contact Val Norton at IPNANZ: email: v.norton@ipn.org.nz or call 04 472 2562 The Information & Resource Unit may be able to supply you with hard copies of resources listed here, but will be constrained by copyright in some cases. Your organisation's library may hold some of these resources or they can be obtained through your local public library via interlibrary loan. Please contact me if you have difficulty obtaining a particular item.

Search the [IPLit](#) database for injury prevention research resources selected for their relevance to the New Zealand environment. For more injury prevention articles from around the world, search [SafetyLit](#)

Kypri, K., Langley, J.D., Saunders, J.B., Cashell-Smith, L.

Assessment may conceal therapeutic benefit: findings from a randomized controlled trial for hazardous drinking [Article]

Addiction, January 2007, 102(1): 62-70

From this Australian based study involving students visiting a primary health care clinic, the authors conclude that the brief assessment appeared to reduce hazardous drinking. Controlled trials that rely on

assessment may therefore underestimate treatment effects. The authors acknowledge the limitations of this study.

Fitzpatrick, P., Daly, L., Leavy, C.P., Cusack, C.A.

Drinking, drugs and driving in Ireland: more evidence for action [Article]

Injury Prevention, December 2006, 12(6): 404-8

Of 2000 specimens from drivers stopped for being suspected of driving under the influence of an intoxicant, 33.1% of drivers under the legal alcohol limit tested positive for one or more drugs. Drugs tested for were amphetamines, methamphetamines, benzodiazapines, cannabinoids, cocaine, opiates and methadone. Only 14.2% of drivers over the legal alcohol limit tested positive for any of these drugs.

Rubie-Davies, C.M., Townsend.M.A.

Fractures in New Zealand elementary school settings [Article]

Journal of School Health, 2007, 77(1): 36-40

76 New Zealand schools completed questionnaires to collect data about the nature and circumstances of fractures sustained by students during normal school hours. The results suggests that changes to the way children interact at school may be as important as modifications to playground equipment in improving children's safety at school.

Drinking, drugs and driving in Ireland: more evidence for action [Article]

Injury Prevention, December 2006, 12(6): 404-8

Of 2000 specimens from drivers stopped for being suspected of driving under the influence of an intoxicant, 33.1% of drivers under the legal alcohol limit tested positive for one or more drugs. Drugs tested for were amphetamines, methamphetamines, benzodiazapines, cannabinoids, cocaine, opiates and methadone. Only 14.2% of drivers over the legal alcohol limit tested positive for any of these drugs.

Beliefs and practices to prevent drowning among Vietnamese-American adolescents and parents

[Article]

Injury Prevention, December 2006, 12(6): 427-9

Focus group interviews were used to determine the beliefs, attitudes and practices regarding water safety among Vietnamese-Americans. The findings highlight the need for water safety messages to be delivered in the ethnic group's first language.

Location: Journals

DOI: <http://dx.doi.org/10.1136/ip.2006.011486>

Assessment may conceal therapeutic benefit: findings from a randomized controlled trial for hazardous drinking [Article]

Addiction, January 2007, 102(1): 62-70

From this Australian based study involving students visiting a primary health care clinic, the authors conclude that the brief assessment appeared to reduce hazardous drinking. Controlled trials that rely on assessment may therefore underestimate treatment effects. The authors acknowledge the limitations of this study.
