

## **IPLit December 2006**

**Injury Prevention Research Centre,  
University of Auckland  
Information & Resource Unit**

**IPLit** aims to keep you up to date with the latest injury prevention research and best practice from New Zealand and around the world.

### **Have you published any injury prevention research which could be included next month?**

You are welcome to visit the Information & Resource Unit and browse the collection. I am available four days per week. Best time to visit: Monday – Thursday, 9am – 4pm. Please call to check availability.

If I am not available, please contact our Administrator for assistance – 09 373 7599 x86348

The Information & Resource Unit provides an enquiry service  
– please contact me by email or telephone.

If you know of someone who would like to receive this list, please let me know.

Gay Richards: email: [injury@auckland.ac.nz](mailto:injury@auckland.ac.nz) or by phone: (09) 373 7599 x84640  
IPRC website: <http://www.health.auckland.ac.nz/ipc>  
Full contact details can be found at the end of this message.

### **Events**

**4 March Children's Day to be celebrated in New Zealand**  
[www.childrenday.org.nz](http://www.childrenday.org.nz)

**Advance Notice 23-29 April 2007 UN Global Road Safety Week Theme: Young Road Users** [www.who.int/roadsafety/projects/week/en/index.html](http://www.who.int/roadsafety/projects/week/en/index.html)

## Publications

**IPLit** Includes books, reports, articles, journals and newsletters received or accessed this month.

Active links to documents freely available on the web are provided, however web addresses can change. If the link does not work, try going to the homepage, shown at the beginning of the address and look for a publications or resources page, or contact me. DOIs are provided where available. These are permanent links to journal articles but unless the publisher provides free access to articles, you may only be able to reach the abstract via this link.

**IPNANZ members are reminded that they have free access to the *Injury Prevention* journal via the IPNANZ website – <http://www.ipn.org.nz> . If you have forgotten your IPNANZ login details, please contact Val**

**Norton at IPNANZ: email: [v.norton@ipn.org.nz](mailto:v.norton@ipn.org.nz) or call 04 472 2562** The Information & Resource Unit may be able to supply you with hard copies of resources listed here, but will be constrained by copyright in some cases. Your organisation's library may hold some of these resources or they can be obtained through your local public library via interlibrary loan. Please contact me if you have difficulty obtaining a particular item.

**For more injury prevention articles from around the world, see SafetyLit at: <http://www.safetylit.org>**

Graham, K., Bernards, S., Osgood, D.W., Wells, S.

**Bad nights or bad bars? multi-level analysis of environmental predictors of aggression in late-night large-capacity bars and clubs** [Article]

*Addiction*, November 2006, 101(11): 1569-1580

This article reports the results of 1334 observations of 118 large bars and clubs (300-plus patrons) in Toronto, Canada. The results demonstrate the importance of the immediate environment (not just the type or bar or the characteristics of usual patrons) and the impact of environmental factors such as staff behaviour in predicting both frequency and severity of aggression.

**The efficacy of two brief intervention strategies among injured, at-risk drinkers in the emergency department: impact of tailored messages and brief advice** [Article]

*Journal of Studies on Alcohol*, July 2006, 67(4): 568-578

This study involving 4,476 participants, used a randomised controlled trial design to compare the effectiveness of four interventions at reducing alcohol consumption, consequences, and heavy episodic drinking among injured, at-risk drinkers in the emergency department. The authors conclude that ED-based interventions for alcohol problems would benefit from computerised screening, brief advice, and booklets to positively impact risky drinking practices.

Miller, T.R., Levy, D.T., Spicer, R.S., Taylor, D.M.

**Societal costs of underage drinking** [Article]

*Journal of Studies on Alcohol*, July 2006, 67(4): 519-528

A detailed analysis of US data estimating the magnitude and costs of problems resulting from underage drinking by category--traffic crashes, violence, property crime, suicide, burns, drownings, fetal alcohol syndrome, high-risk sex, poisonings, psychoses, and dependency treatment--and compared those costs with associated alcohol sales. The authors conclude that alcohol use by minors should be a higher priority for government decision-makers who focus much attention on illicit drug use.

**Stimulant effects of 3,4-methylenedioxymethamphetamine (MDMA) 75 mg and methylphenidate 20 mg on actual driving during intoxication and withdrawal.** [Article]

*Addiction*, November 2006, 101(11): 1614-1621

A double-blind, placebo-controlled, three-way cross-over study was conducted in the Netherlands with 18 recreational MDMA users. This study indicated that MDMA use may improve certain aspects of the driving task, but may reduce performance in aspects of driving, such as accuracy of speed adaption during car following performance.

**The Western Australian Child Health Survey: Strengthening the capacity of Aboriginal children, families and communities** [Report] Perth: Curtin University of Technology Telethon Institute for Child Health Research, 2006, 656pp. 0 9775975 0 4 (v. 4).

This report, based on a large survey of Aboriginal children in Western Australia, identifies the reasons why there had been little or no improvement in the health and well-being of Aboriginal children despite a large number of intervention programmes. The report makes a number of recommendations for more effective intervention programmes. This is a large report - it can be downloaded in sections or as a summary using the second link below.

Ramaekers, J.G., Kuypers, K.P.C., Samyn, N.

**Stimulant effects of 3,4-methylenedioxymethamphetamine (MDMA) 75 mg and methylphenidate 20 mg on actual driving during intoxication and withdrawal.** [Article]

*Addiction*, November 2006, 101(11): 1614-1621

A double-blind, placebo-controlled, three-way cross-over study was conducted in the Netherlands with 18 recreational MDMA users. This study indicated that MDMA use may improve certain aspects of the driving task, but may reduce performance in aspects of driving, such as accuracy of speed adaption during car following performance.

## Violence

6415

Graham, K., Bernards, S., Osgood, D.W., Wells, S.

**Bad nights or bad bars? multi-level analysis of environmental predictors of aggression in late-night large-capacity bars and clubs** [Article]

*Addiction*, November 2006, 101(11): 1569-1580

This article reports the results of 1334 observations of 118 large bars and clubs (300-plus patrons) in Toronto, Canada. The results demonstrate the importance of the immediate environment (not just the type of bar or the characteristics of usual patrons) and the impact of environmental factors such as staff behaviour in predicting both frequency and severity of aggression.

Miller, T.R., Levy, D.T., Spicer, R.S., Taylor, D.M.

**Societal costs of underage drinking** [Article]

*Journal of Studies on Alcohol*, July 2006, 67(4): 519-528

A detailed analysis of US data estimating the magnitude and costs of problems resulting from underage drinking by category--traffic crashes, violence, property crime, suicide, burns, drownings, fetal alcohol syndrome, high-risk sex, poisonings, psychoses, and dependency treatment--and compared those costs with associated alcohol sales. The authors conclude that alcohol use by minors should be a higher priority for government decision-makers who focus much attention on illicit drug use.
