Course content

The Auckland University Department of Paediatrics established this annual course in 1988. It is a two-week intense review of topics, tailored for the Part 1 FRACP Paediatric examination. Over 60 practicing clinicians from Starship and other NZ hospitals present during the course, and speakers are carefully chosen to be up-to-date and informative. The course is updated every year and involves a mixture of topic reviews and mock questions within each session.

To ensure maximal individual benefit and support, the places are limited in this course. The course is regularly oversubscribed and sold out. Early expressions of interest and early registration are recommended.

Most hand-outs and a web-based programme of the topics are available to the students attending the course. The success of the programme has been testified by direct feedback and ultimate examination success from the students after the course.

If you are interested in this course and have had an unsuccessful exam result before, please contact the course coordinator at: fracpadmin@auckland.ac.nz for further discussion.
