

Auckland Region Vascular Atlas user guide IV: Ring maps

This user guide is divided into 3 short sections. By the end of this quick guide, you will be able to:

- A. Navigate through the user interface and controls ;
- B. Display different data sets and view corresponding visuals;
- C. Display useful combinations of data for analysis

Quick Find Index		
1 Data Panel	9 Ring Map Symbology	11 Find and display data based on demographic groups
2 Legend and Pie Chart	10-1 Explore the Data Panels	12 Select parts of data – using different methods
3 Bar Chart	10-2 Select Data in the Charts	13 See Patterns and Variations
4 Data Animation	10-3 Visualise Selection in the Map	14 Compare ring maps and cartograms
5 Line Chart	10-4 Explore the Tabular Data Panel	15 Other Useful Configurations
6 Map Panel		
7 Tabular Data Panel

A: Basic User Interface and Controls

1 Data Panel

Changes data displayed on map. Click ► to expand grouping. Selection of a variable will be displayed on the map panel. Click to select the variable or hover to highlight. Click – or + to collapse or expand all.

2 Legend and Pie Chart

Click to display legend class or pie segment on map. Click to open legend settings panel

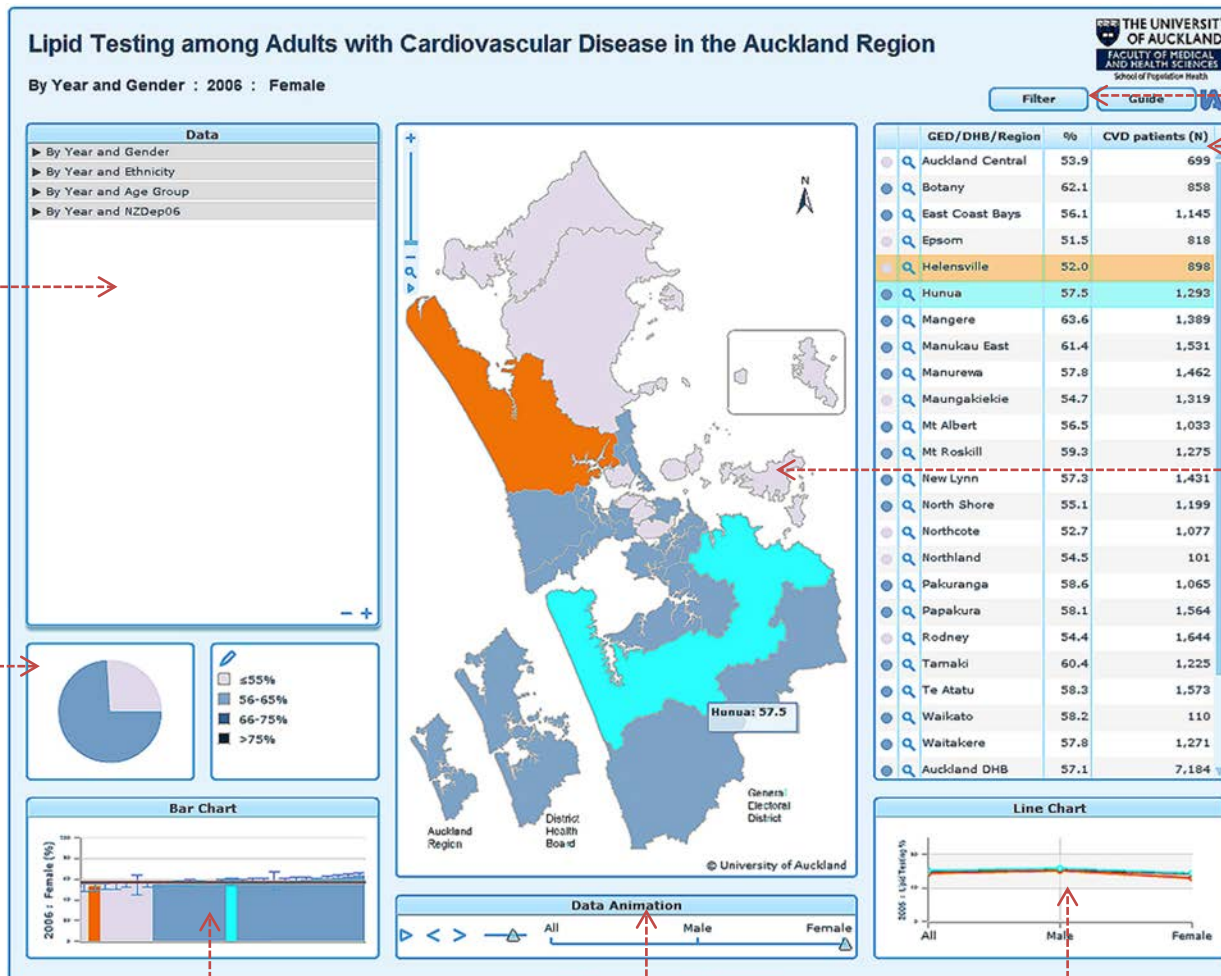

NB: classifiers alter the methodology for breaking and grouping data. All windows/panels can be resized and moved around the screen.

General Controls

Hover cursor to highlight data. Left click to select data. Right click displays menu on screen, including Clear Selection and Clear Filter to start over.

Map shows 3 levels of geography

Auckland Region, District Health Board (DHB), and General Electoral Districts (GEDs). Data displayed in multiple forms (map, table, pie, bar, line charts).

3 Bar Chart

Hover to see the mean, and upper and lower limit for each GED. Click on a bar to display the selection of on the map. Hold Ctrl+ to select multiple mesh-blocks. Red line — indicates Auckland regional mean.

4 Data Animation

Plays an animation of different sub-groups within a data category. Click ► to play, < > to move back/forward one variable. Click ▲ to adjust speed.

5 Line Chart

Shows selected or highlighted data as line plots. Red line indicates Auckland regional mean.

8 Filter Button

Contains pre-set selections to display data for DHBs and GEDs only.

7 Tabular Data Panel

Contains all data for all areas (% and n value). Make single or multiple selections.

6 Map Panel

Click to select a GED, DHB or region. The mouse wheel can be used to Zoom in and out. Click ► to open the menu.

NB: Map shows 3 levels of geography.

Video Demonstration

[1. Overview of basic controls and display option \(4:20\)](#)

B: Display Different Data Sets

10-1 Explore the Data Panels

Ringmap Data (above) and Cartogram Data (below)

Data are grouped into themes. Expand them to explore different indicators using different variables. Selections made will appear on corresponding maps, tables, and charts.

Ringmap Data

- ▼ Māori
 - ▼ Lipid Testing Percentage (%)
 - Lipid%
 - CVD Patient Distribution (%)
- Pacific
- ▼ Indian
 - Lipid Testing Percentage (%)
 - CVD Patient Distribution (%)
- NZEO

Cartogram Data

- Maori
- ▼ Pacific
 - Lipid Testing Percentage (%)
 - CVD Patient Distribution (%)
- Indian
- ▼ NZEO
 - Lipid Testing Percentage (%)

10-2 Select Data from Charts

Data can be further filtered using legend, chart, graph or GED/DHB filters. NB: **Hold ctrl+ or shift+** to make multiple selections.

9 Ring Map Symbolology

Ringmap Symbolology

Outer-ring = Value for Auckland region
 Inner Rings = Value for individual GEDs
 Ring colour = Legend classification
 Ring Segment = Age groups
 Ring Order = Least deprived (inner ring), most deprived (outer ring).

Cartogram Symbolology

GED surface area correlates to population value (population size).

10-4 Explore the Tabular Data Panel

Tabular data corresponds to map. Click ● or click anywhere on the row to make a selection. Click 🔍 to zoom to area (GED, DHB, and region) **Ctrl+** or **Shift+** to select multiple rows.

Click category labels to sort table by value

%	CVD patients (N)
68.5	3,475
68.0	20,900
67.8	289

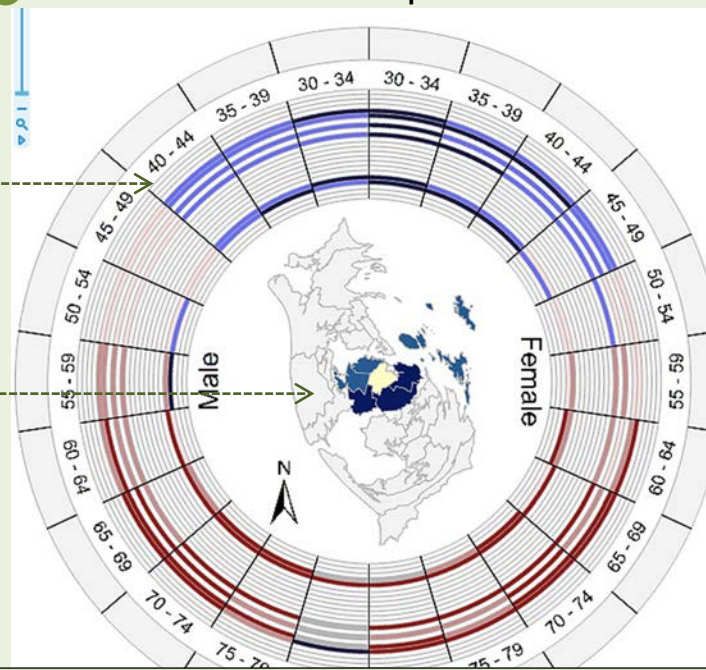

Ringmap Table			
	Sector ▲	%	CVD Patients (N)
●	Auckland C...	2.3	769
●	Auckland C...	1.3	683
●	Auckland C...	2.9	558
●	Auckland C...	5.5	587
●	Auckland C...	4.3	419
●	Auckland C...	16.6	302
●	Auckland C...	26.2	172
●	Auckland C...	37.6	117
●	Auckland C...	29.3	82
●	Auckland C...	37.7	77
●	Auckland C...	61.1	18
●	Auckland C...	2.9	700
●	Auckland C...	4	656
●	Auckland C...	5.3	549
●	Auckland C...	10	471

Cartogram Table			
	GED	%	CVD Patients (N)
●	Tamaki	10.7	7,400
●	Maunga...	9.2	12,...
●	Mt Roskill	9.2	5,483
●	Aucklan...	8.5	7,055
●	Mt Albert	8.4	7,983
●	Epsom	5.2	2,697

General Display Options

For pie charts, legends, bar and line graphs, map GEDs, rings and tables. Clicking selection(s) and/or hovering cursor will generate a visualisation on charts, table, map, and rings, accordingly (i.e. **Orange** = selected, **blue** = hovering cursor).

10-3 Visualise Selection in the Map

Example: Filter selection using Auckland DHB for both data sets

C: Useful Combinations for Analysis: Ring maps

11 Find and display data based on demographic groups

Ringmap Data

- ▼ Māori
 - Lipid Testing Percentage (%)
 - Lipid%
 - ▼ CVD Patient Distribution (%)
 - CVD%
- Pacific
- Indian
- NZEO

Expand Category
Reveal data sets for respective ethnicity

Select sub-category
Reveal data sets for respective indicators

Select Variable
Display data set for variable. I.e. Lipid and CVD rates

Cartogram Data

- Māori
- Pacific
- Indian
- ▼ NZEO
 - Lipid Testing Percentage (%)
 - Lipid%
 - ▼ CVD Patient Distribution (%)
 - CVD%

12 Select Parts of Data – using different methods

Extra filters can be applied to charts, maps and tables for both ringmap and cartogram.

A – Select by Classification using Pie Chart and Legend

E.g. Select GEDs with lipid rate of 40% ONLY for Maori.

E.g. Select GEDs with CVD of $\leq 6.0\%$ and $> 8.5\%$ ONLY for NZEO.

B – Select by 95% CI using bar Chart

E.g. Select GEDs with values below Auckland mean ONLY.

C – Select by District Health Boards using Filter Button

E.g. Select GEDs belonging to Counties Manukau DHB ONLY.

Note: Click to make selection or Ctrl+ click to make multiple selections. Selection(s) will be highlighted in the tables and charts.

Right-click to 'Filter by Selection'. To cancel, choose 'Clear Selection' at any time or select 'Remove Filter' from menu. 8

Ringmap Fi...

- ▼ DHB
 - All DHBs
 - Auckland DHB
 - DHB
 - Counties Manukau
 - Waitemata DHB
- ▼ GED
 - Auckland Central
 - Botany
 - East Coast Bays
 - Epsom
 - Helensville
 - Hunua
 - Mangere

Cartogram...

- ▼ DHB
 - Auckland DHB
 - Counties Manukau
 - Waitemata DHB
- ▼ GED
 - Auckland Central
 - Botany
 - East Coast Bays
 - Epsom
 - Helensville
 - Hunua
 - Mangere

13 See Patterns and Variations

When ringmap data and cartogram data are both displayed for the same variables, e.g. CVD patient distribution % for Maori, then rings will show **demographic variations** while cartogram shows **geographic variations**.

Ring segments, GEDs, and charts are colour coded based on legend classification.

14 Compare ring maps and cartograms

Useful for comparing patterns and trends for two variables. Selections can be filtered down in each map to further show variation and patterns between data sets.

A – Compare ethnic groups

Using same variable for different ethnicities

B – Compare geography and demographic values

Compare GEDs belonging to a DHB to see the variation between two variables.

C – Compare patterns for gender

See variation between gender for different age groups based on deprivation

15 Other Useful Configurations

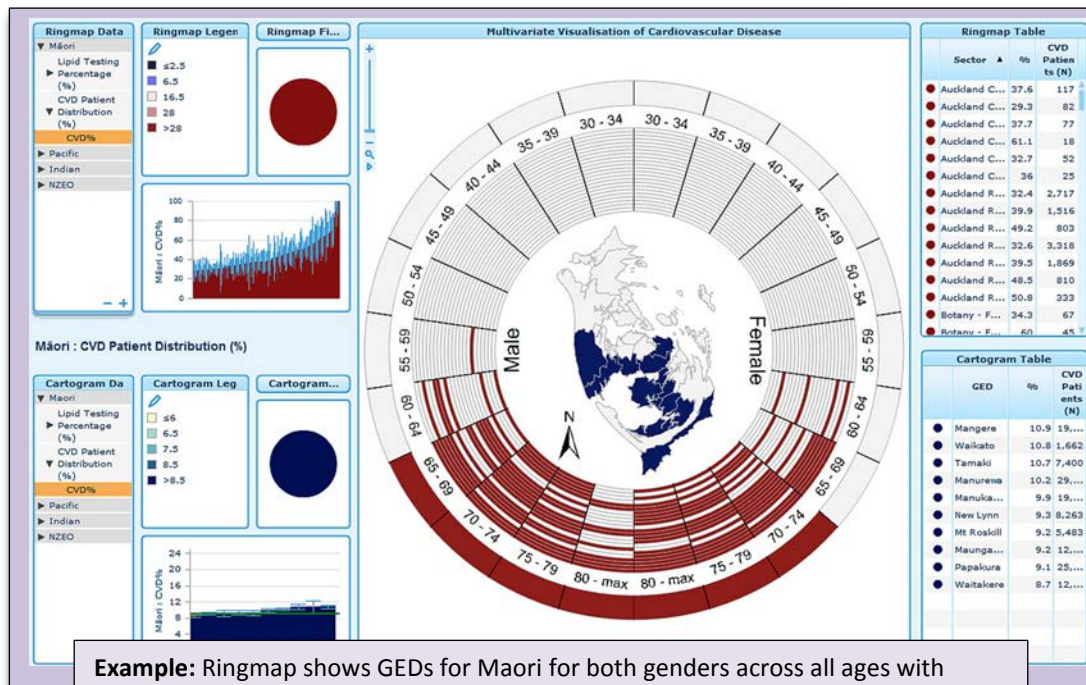

- Isolate individual GEDs and viewing all data for all gender and all age groups.

- Isolate DHB to see demographic variation for variable X and geographic variation for variable Y.

Tip: Select all relevant rows from the table panel (Ctrl+ or shift+) and filter selection (right click menu)

Video Demonstration

[2. Examples of useful configurations for ring maps \(3:15\)](#)

Example: Ringmap shows GEDs for Maori for both genders across all ages with highest distribution rates (red) and cartogram shows GEDs with highest overall CVD distribution rates (blue).
