IPLit aims to keep you up to date with the latest injury prevention research and best practice from New Zealand and around the world.

Have you published any injury prevention research which could be included next month?

You are welcome to visit the Information & Resource Unit and browse the collection. I am available four days per week. Best time to visit: Monday – Thursday, 9am – 4pm. Please call to check availability.

If I am not available, please contact Jessica O’Donnell for assistance – 09 373 7599 x86341

The Information & Resource Unit provides an enquiry service – please contact me by email or telephone.

If you know of someone who would like to receive this list, please let me know.

Gay Richards Email: injury@auckland.ac.nz or by phone: (09) 373 7599 x84640

IPRC website: http://www.auckland.ac.nz/ipc

Full contact details can be found at the end of this message.

Events

1-7 May Rape Awareness Week http://www.rapecrisis.org.nz

15 May International Day of Families

15-21 May Youth Week http://www.nzaahd.org.nz

4 June International Day of Innocent Children Victims of Aggression
Publications

IPLit is the new name for IPRCs monthly new resources list. IPLit includes books, reports, articles, journals and newsletters received or accessed this month.

Active links to documents freely available on the web are provided, however Web addresses can change. If the link does not work, try going to the homepage, shown at the beginning of the address and look for a publications or resources page, or contact me. DOIs are provided where available. These are permanent links to journal articles byt unless the publisher provides free access to articles, you may only be able to reach the abstract via this link.

The Information & Resource Unit may be able to supply you with hard copies of resources listed here, but will be constrained by copyright in some cases. Your organisation’s library may hold some of these resources or they can be obtained through your local public library via interlibrary loan. Please contact me if you have difficulty obtaining a particular item.

Bangladesh health and injury survey: report on children
The Bangladesh Health and Injury Survey was conducted in 2003. It is the first comprehensive survey of the injury burden in Bangladesh and the largest injury survey every conducted at a community level in a developing country. The survey reveals the injury epidemic in Bangladesh where from a total population of 140 million, 83 children die as a result of injury every day. Drowning is the leading cause of death in children 0-4 years of age. The report also contains qualitative data capturing risk perceptions and cultural and behavioural factors which impact on injury prevention practices.

Evaluating the effectiveness of public health interventions: the role and activities of the Cochrane Collaboration
Journal of Epidemiology and Community Health, April 2006, 60(4): 285-289
An introduction to the relevance of systematic reviews conducted by the Cochrane Collaboration in the area of public health, and some of the issues associated with this area of health. This paper focuses on the work of the Cochrane Health Promotion & Public Health Field. Also of relevance to injury prevention practitioners is the Cochrane Injuries Review Group. The CRGs are primarily responsible for publishing new Cochrane Reviews. The full Cochrane Library can be accessed by New Zealand based internet users at via the Ministry of Health website at: http://www.moh.govt.nz/cochranelibrary . The Cochrane Library website has recently been upgraded to make it more user-friendly.

Dunn, C., Ostafin, B. Brief interventions for hospitalized trauma patients Journal of Trauma, 2005, 59(3): s88-s93
This paper describes brief interventions for substance abuse (including alcohol) provided by a trauma centre to hospitalised patients. A generic model is described with details of this addiction intervention service. This is just one paper from the Alcohol and Other Drug Problems Among Hospitalized Trauma Patients: Controlling Complications, Mortality, and Trauma Recidivism conference held in Washington, DC, May 28–30, 2003. This 166 page supplement to the Journal of Trauma provides access to the conference proceedings.

Injury Surveillance

5940
Rahman, A., Rahman, A.K.M.F., Shafinaz, S., Linnan, M.
Bangladesh health and injury survey: report on children
The Bangladesh Health and Injury Survey was conducted in 2003. It is the first comprehensive survey of the injury burden in Bangladesh and the largest injury survey every conducted at a community level in a developing country. The survey reveals the injury epidemic in Bangladesh where from a total population of 140 million, 83 children die as a result of injury every day. Drowning is the leading cause of death in children 0-4 years of age. The report also contains qualitative data capturing risk perceptions and cultural and behavioural factors which impact on injury prevention practices.
