GAY AUCKLAND PERIODIC SEX SURVEY 2014

THE SITUATION TODAY?

For over a decade, researchers have worked alongside gay and bisexual communities to better understand our sexual and health practices.

New Zealand AIDS Foundation
Te Tūāpapa Māta Arahore o Aotearoa

Gay, bisexual and other men who have sex with men (GBM) and our communities pioneered HIV prevention in NZ but are still the group **MOST AT RISK**.

77%

of local **HIV infections** diagnosed in 2013 were **GBM**.
20% were **heterosexually infected**.

We learn a lot from this research that improves HIV prevention for GBM.

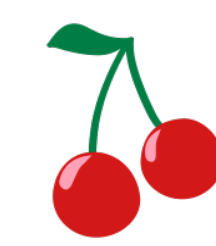

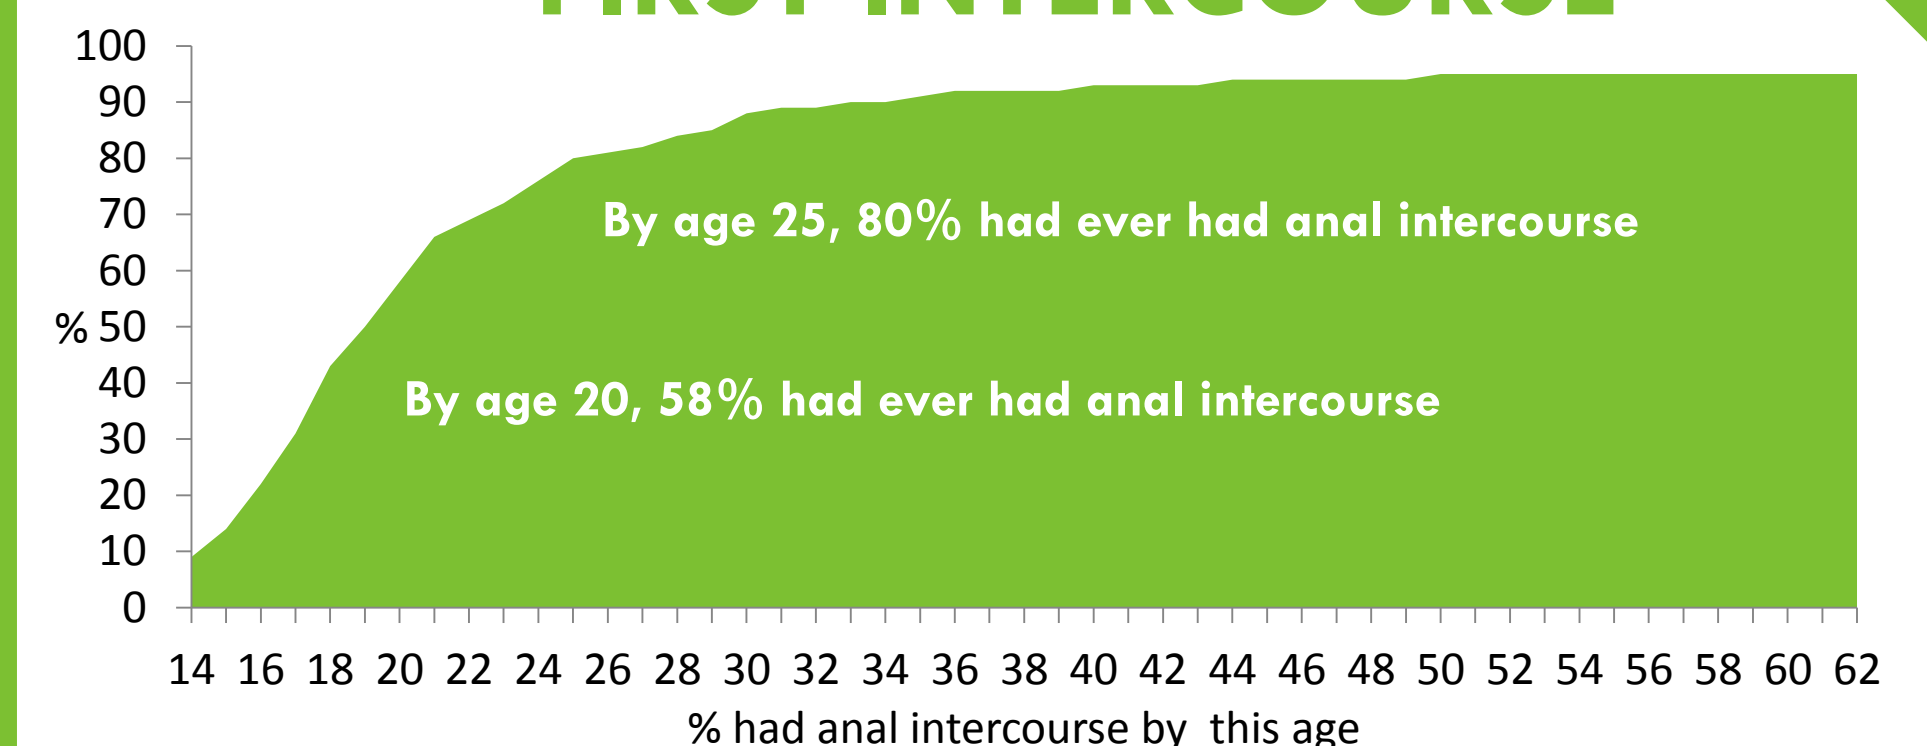

1421

took part in our Auckland survey in 2014.

Respondents were diverse ...

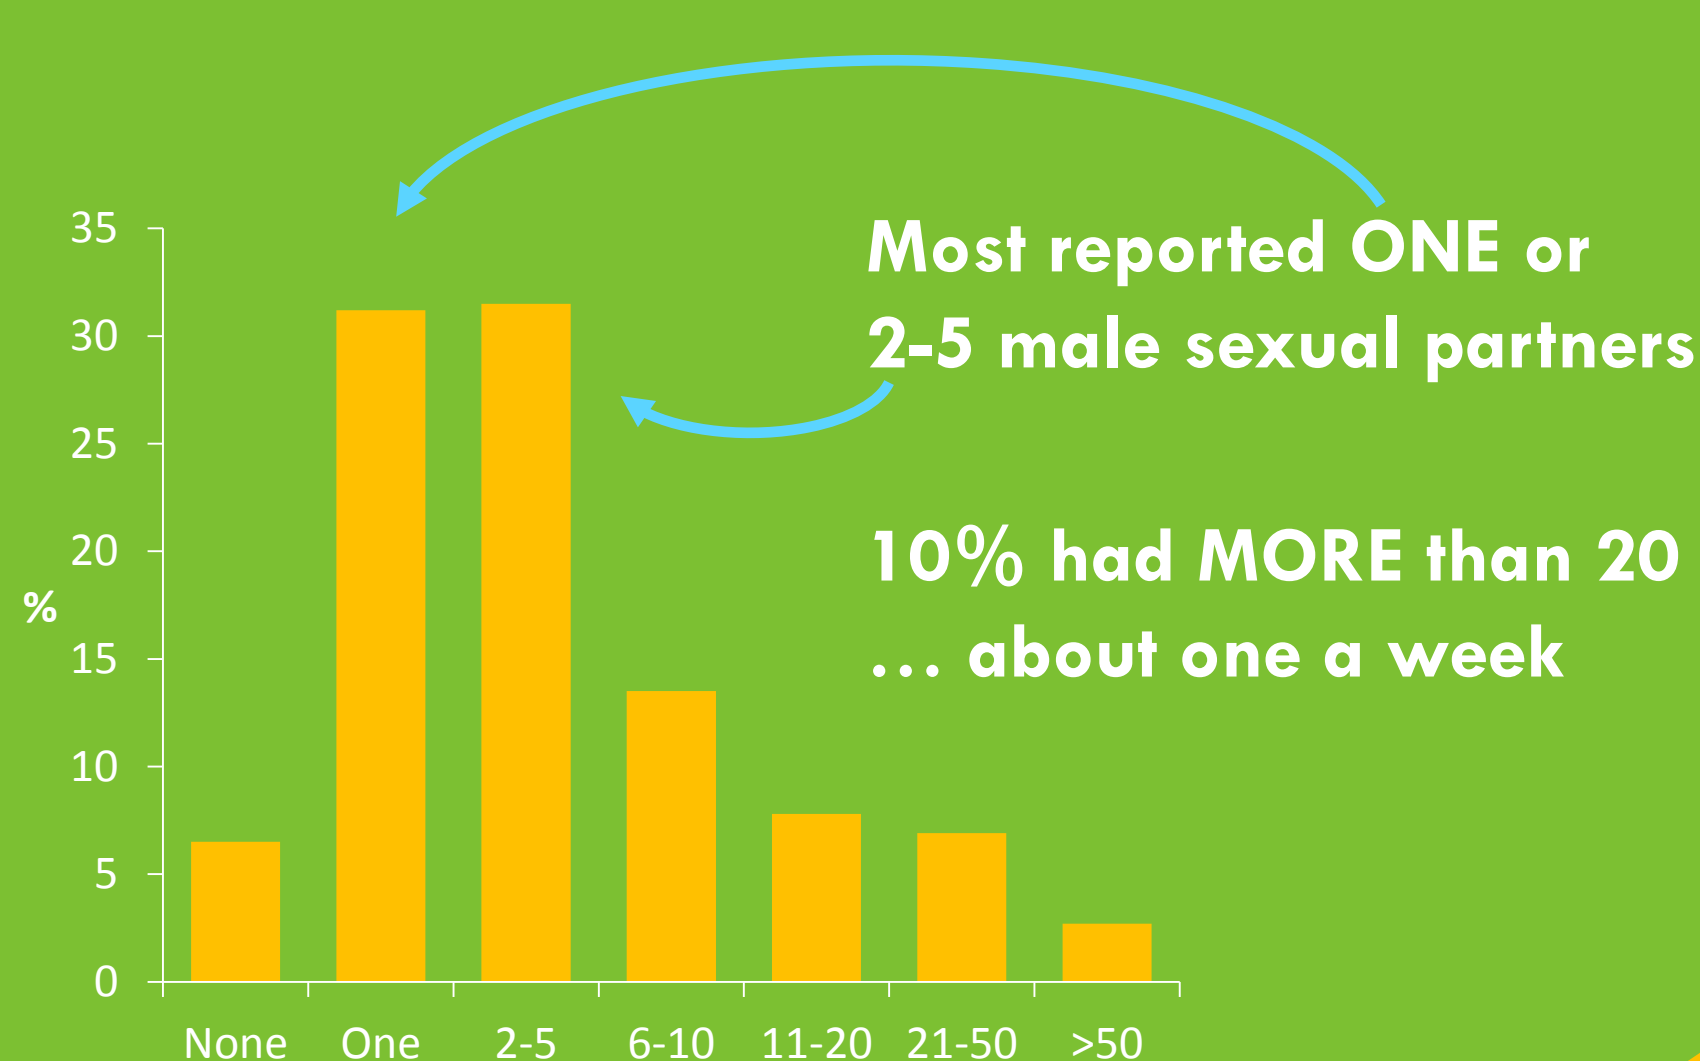

39% aged <30
29% Asian, Maori or Pacific
11% bisexual, takatāpui, fa'afafine

FIRST INTERCOURSE

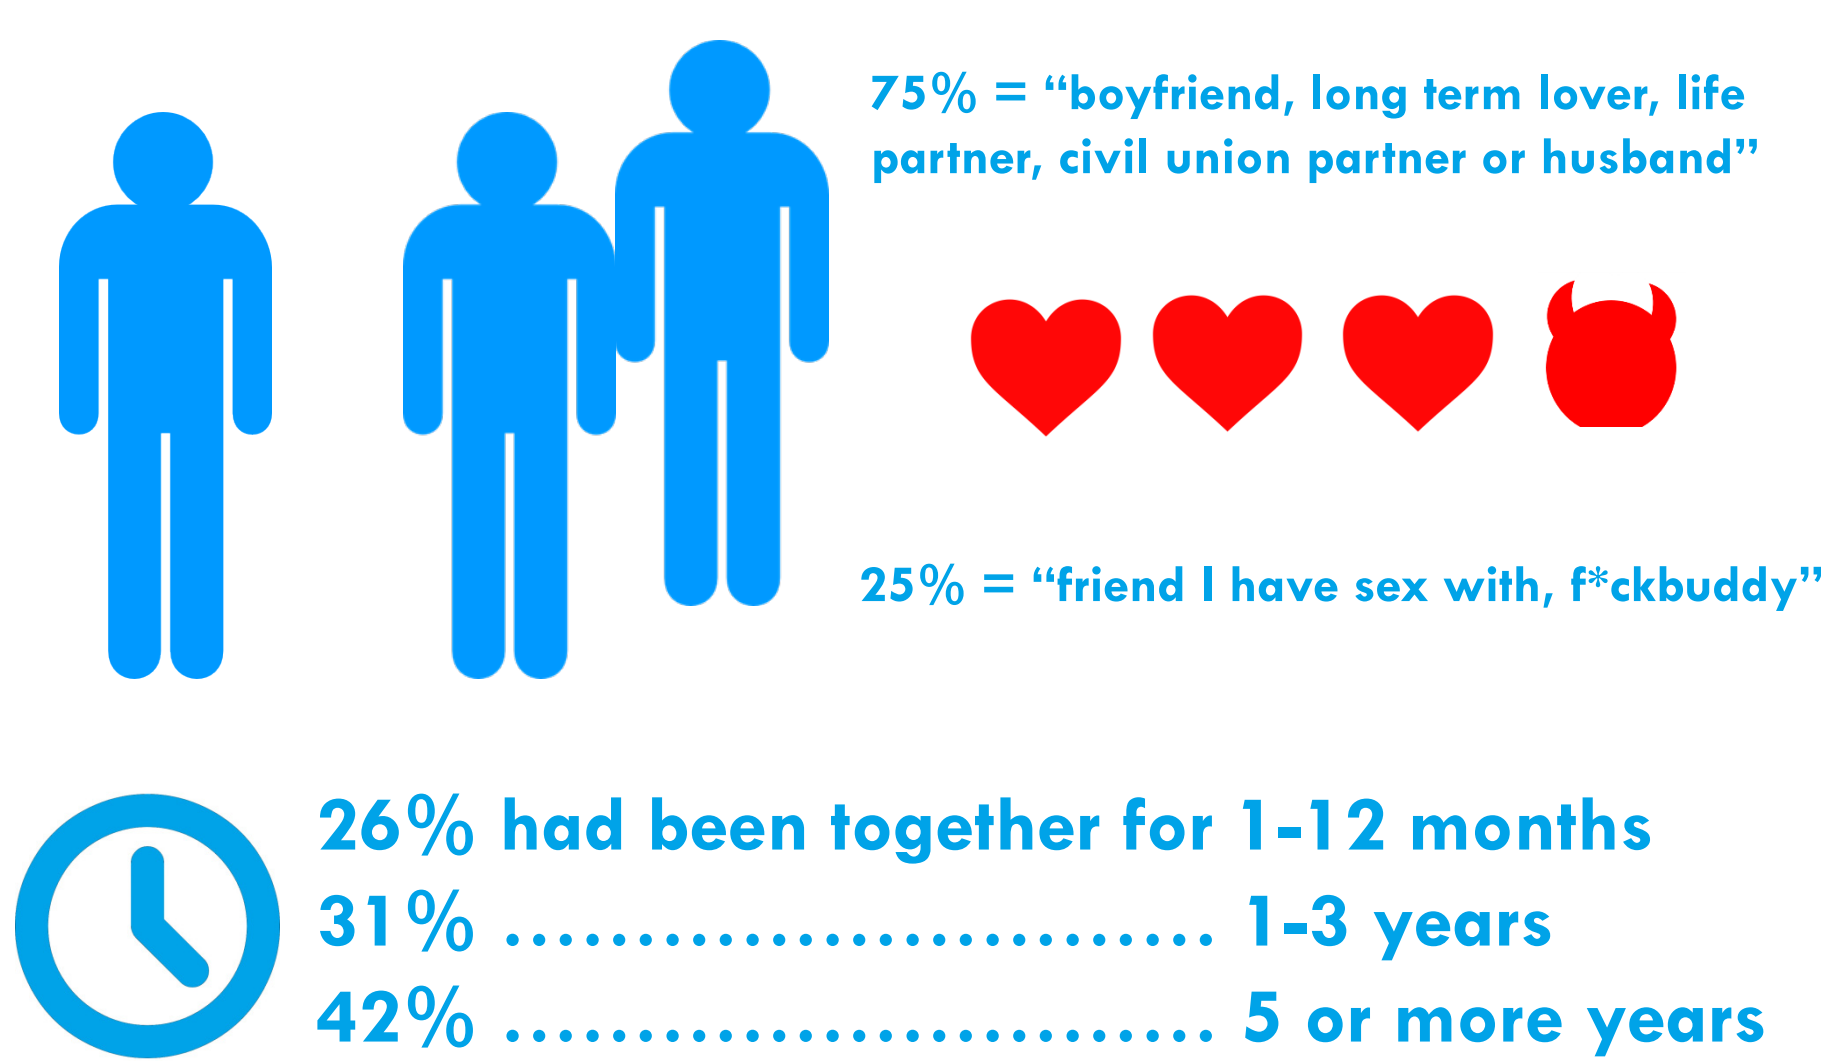

65% were the "bottom", **35%** the "top"
63% used a condom at their first time
(this was higher at 80% for first timers in 2013)

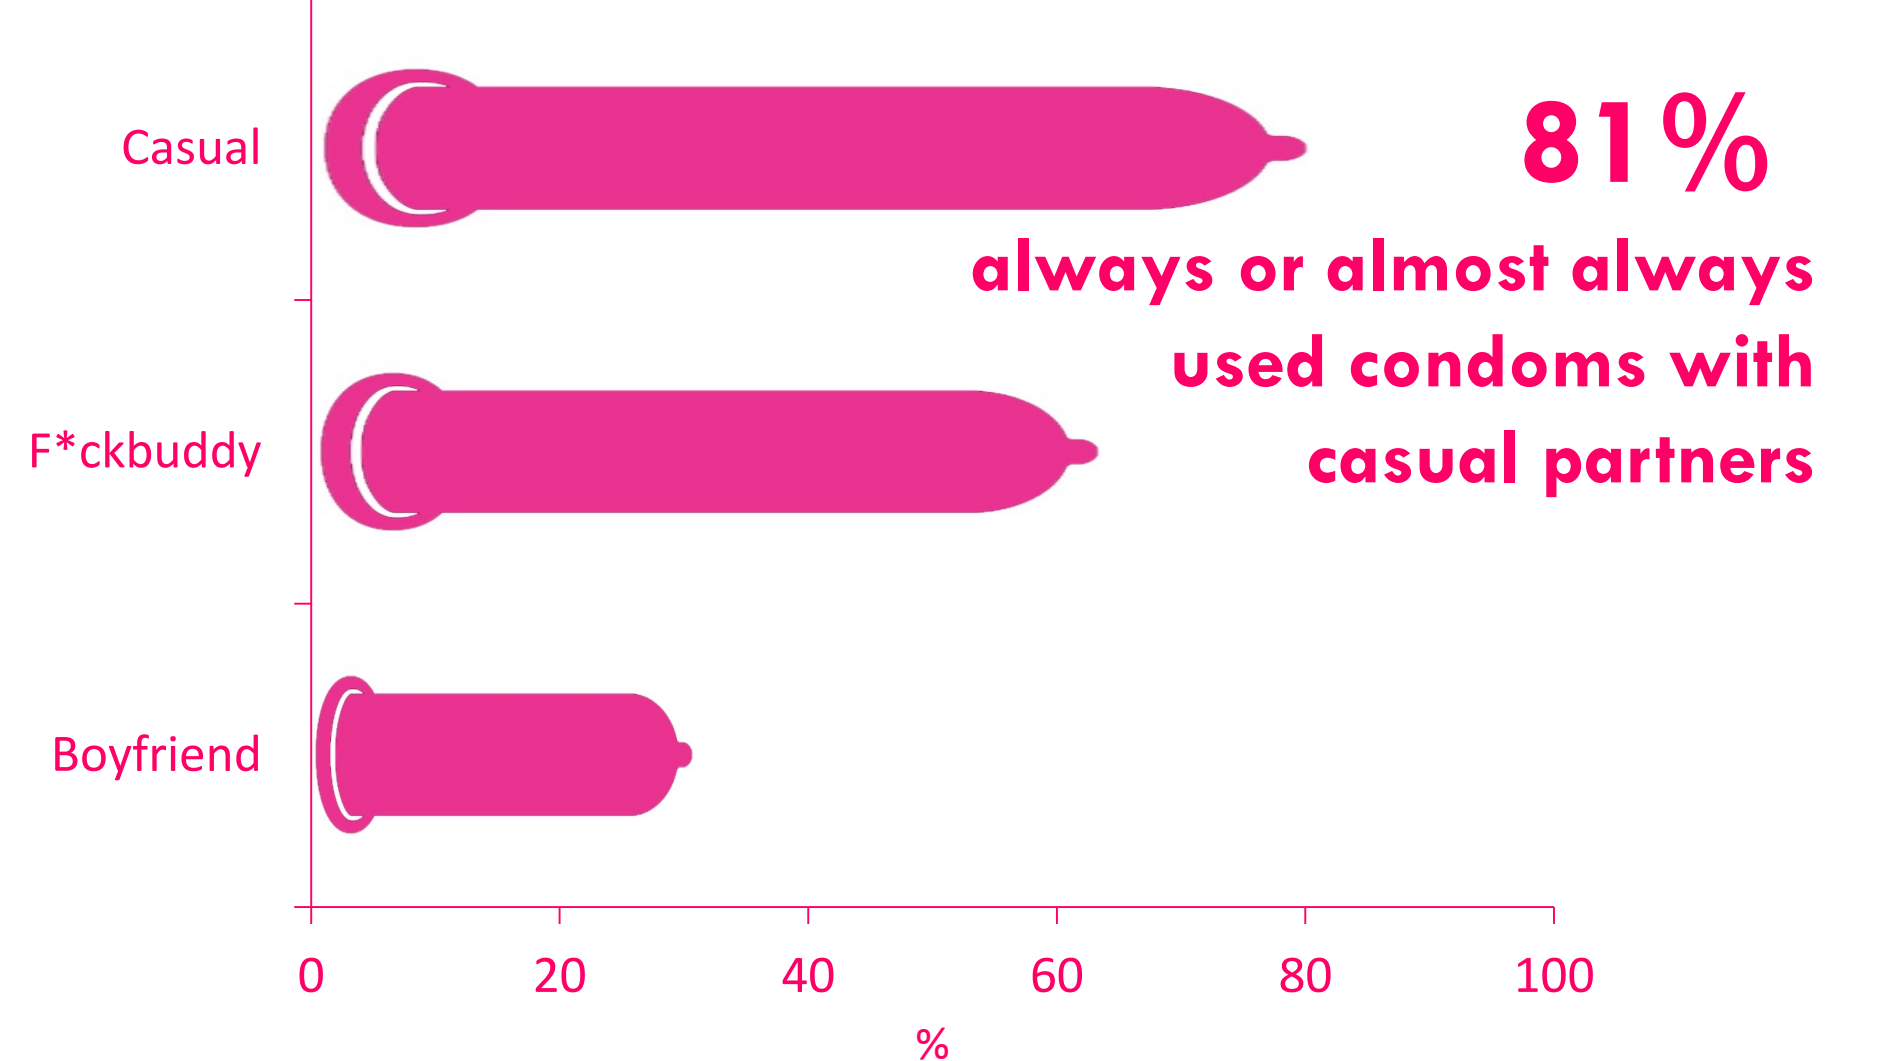

HOW MANY in the last 6 MONTHS?

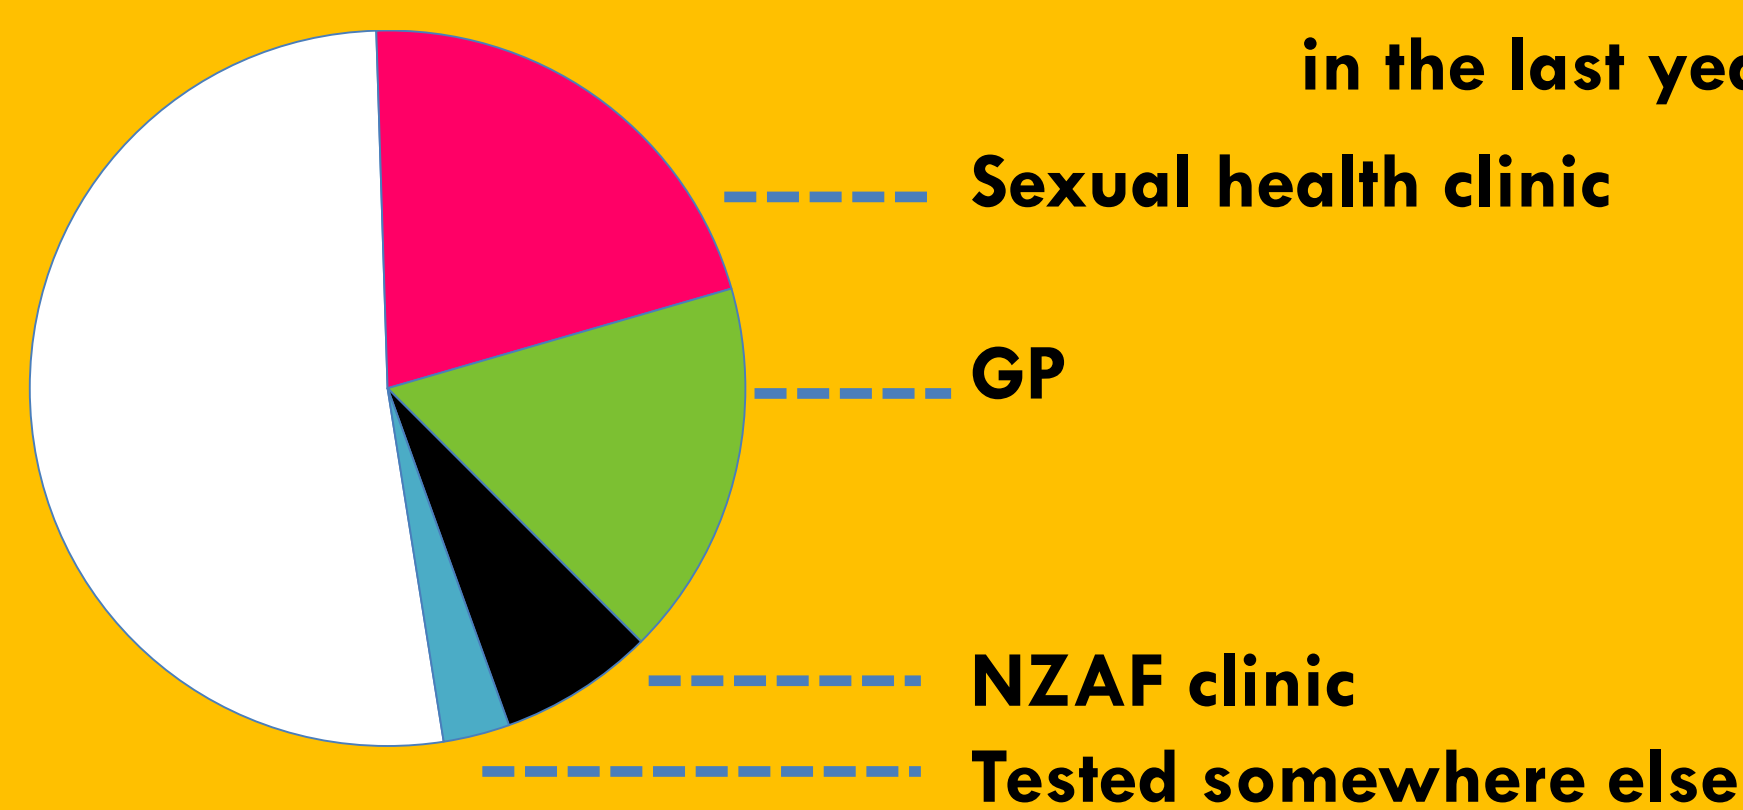

HALF (54%) have a REGULAR PARTNER

CONDOMS

Almost **HALF (48%)** had **TESTED FOR HIV** in the last year

1 in 16 of us have been **diagnosed HIV+**

HALF (52%) had a sexual health checkup in the last year

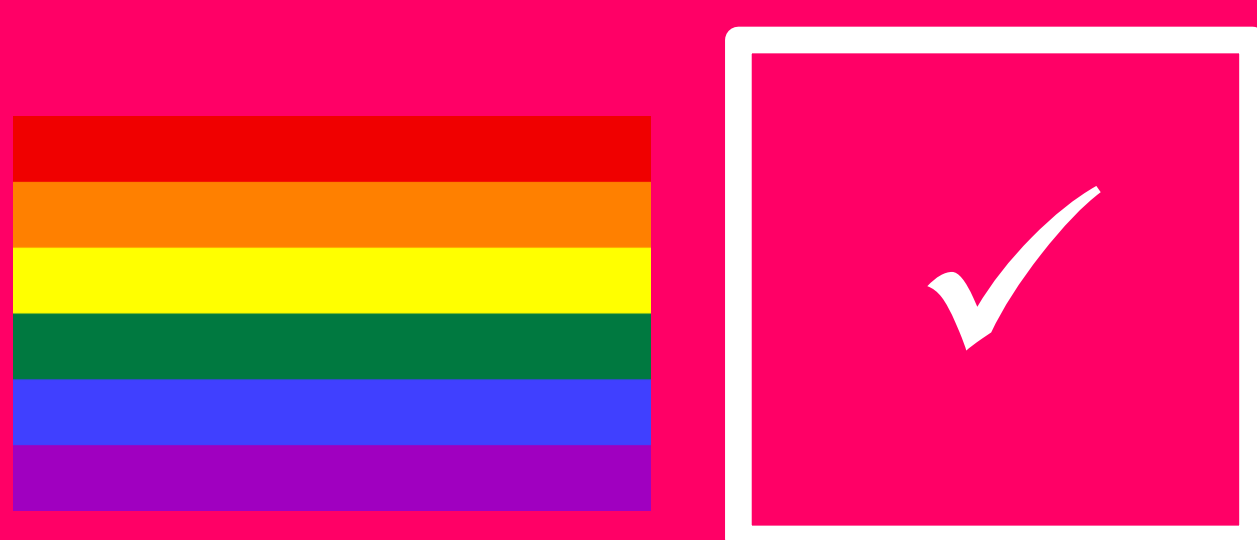

1 in 8 received an STI diagnosis

ONE THIRD knew that human papillomavirus (HPV) can cause anal cancer in males

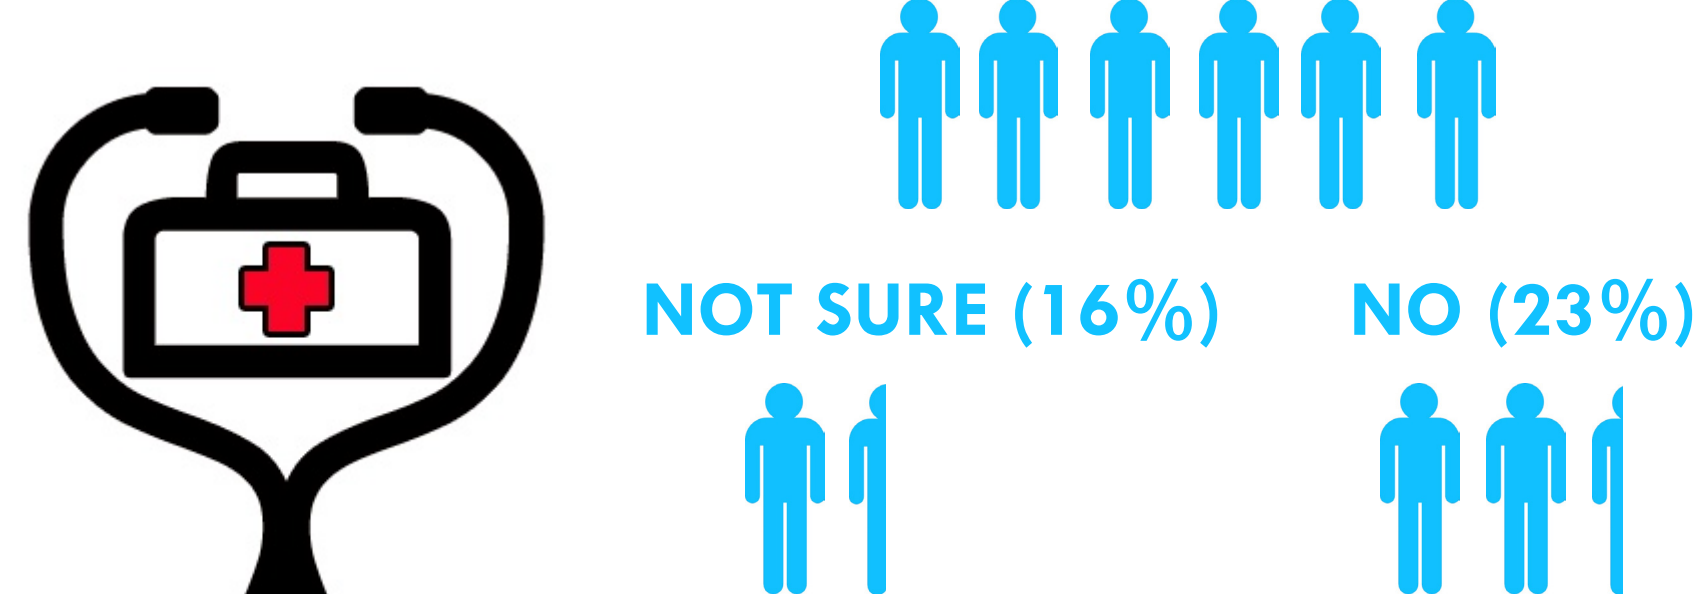

ONE in FIVE knew that the GARDASIL VACCINE protects males against these anal and other cancers

69% would get vaccinated if it were offered for free
But only 15% would if they had to pay \$500 (current unsubsidised price)

72% would be **OK** having their **SEXUAL ORIENTATION** in their health records

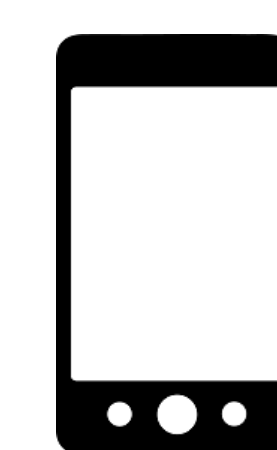

Does your GP know about your **ORIENTATION**?

IF your GP doesn't know that you are GBM, they can't offer you the best care and advice

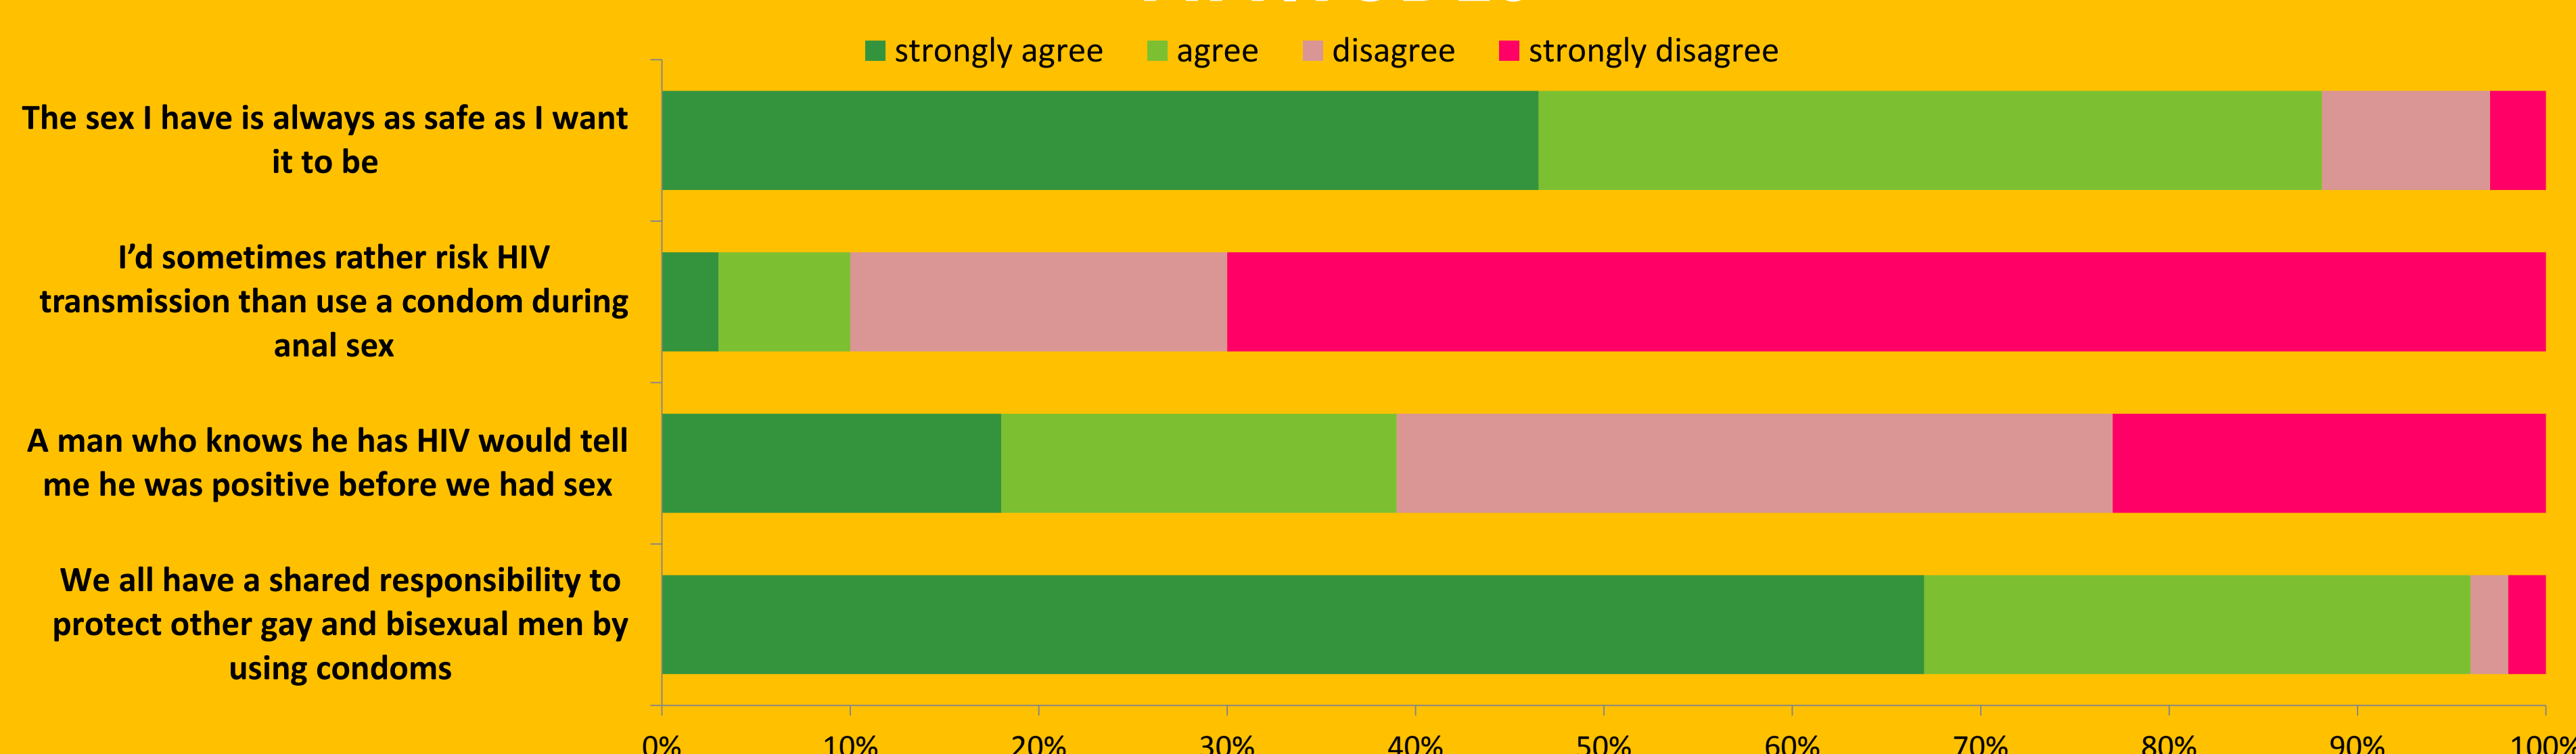

75% had ever **HOOKED UP** online

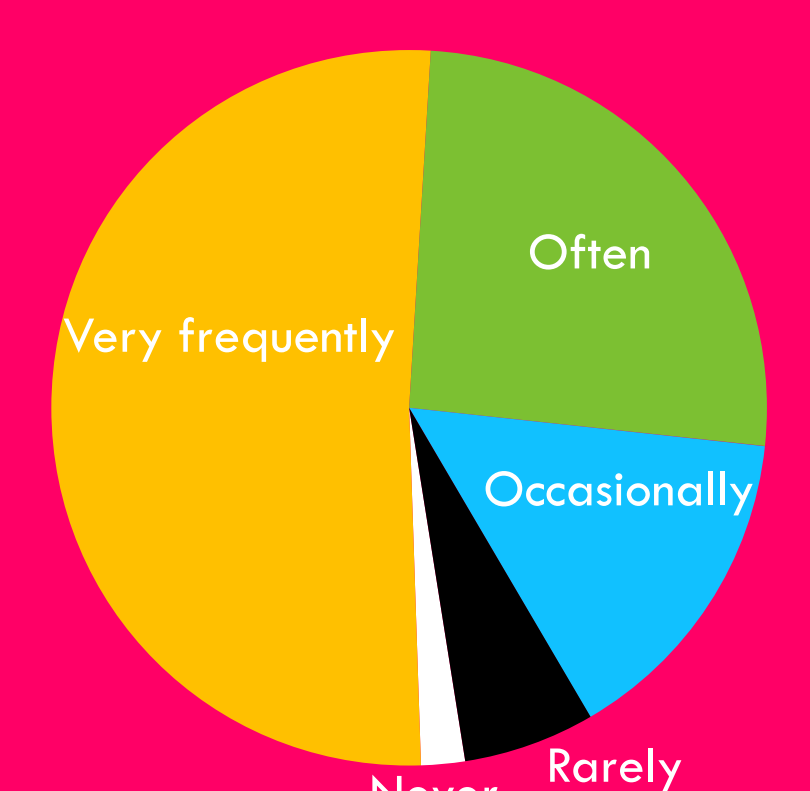

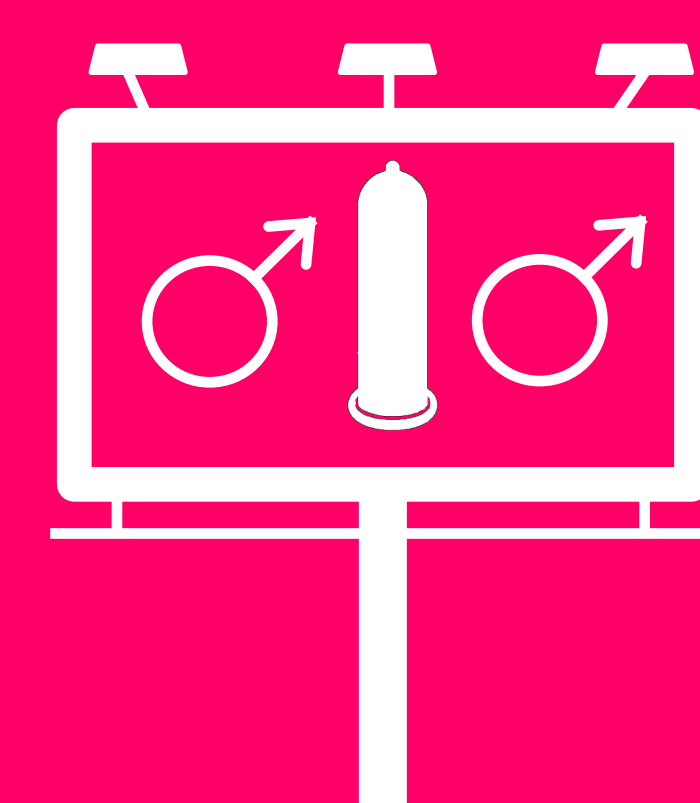

53% currently have an **ACTIVE DATING PROFILE**

44% of guys with a current regular sexual partner also have an active profile

ATTITUDES

Seen condoms promoted last year?

61% saw **THREE OR MORE** promotional avenues e.g. billboards, online ads, condom packs
